■ INDUSTRY PROFESSIONALS SERIES

PPP/P3 & INFRASTRUCTURE: FINANCIAL MODELLING & TRANSACTION ANALYSIS

Master world-leading techniques and gain a broad commercial understanding of financial modelling for PPP/P3 transactions in the infrastructure sector. Tailored to North American PPP/P3 project structures, this practical course will teach you the world-class modelling techniques required for investors, sponsors, developers and bankers.

This hands-on three-day course will give you the skills to develop flexible and transparent structures for diverse PPP/P3 projects modelling, with a focus on commercial analysis. You will develop the skills to turn a blank Excel workbook into a fundamental tool in a successfully executed PPP/P3 transaction.

WHAT YOU WILL TAKE AWAY FROM THIS COURSE

- Invaluable financial model examples with re-usable, critical components such as scenario analysis, funding mechanics, financial statements and risk metrics
- Comprehensive guidelines for PPP/P3 risk metrics, best practice financial modelling and Excel shortcuts
- Extensive check-lists for successful quality assurance of a transaction model

IS THIS PROGRAMME FOR YOU?

Yes, if are exposed to financial models in the PPP/P3 sector and aspire to build world-class modelling skills. Mastering financial modelling is a critical foundation skill for career progression and success in the infrastructure sector: this course will equip you with invaluable life-long learning.

COURSE PREREQUISITES

You will require a fundamental understanding of the underlying concepts of PPP/P3 transactions, corporate finance theory and functional knowledge of Excel spreadsheets.

DURATION
3 DAYS

DELIVERY
IN-HOUSE OR PUBLIC

KEY LEARNINGS

- Acquire skills to take a blank spreadsheet to a PPP/P3 transaction financial close
- Understand typical VBA applications for PPP/P3
- Learn flexible modelling techniques for debt analysis, covenants, financial statements and investment metrics
- Implement a powerful framework for scenario analysis in investment, structuring and risk analysis
- Gain a deep understanding of the financial modelling implications of industry metrics, funding mechanics, risk analysis and legal structure
- Master transparent, flexible and professionally styled modelling for presentation

TRAINER SUPPORT HOTLINE

We view every training course as a long term commitment to course delegates. Our objective is not just to take you through the training and then leave you to your own devices - it is to fundamentally transform your Excel and financial modelling skills.

This is why your course fee includes post-course access to your trainer and the Corality Trainer Support Hotline.
